

# Join the Young Dairy Network Committee

## We are looking for new committee members

The Young Dairy Network (YDN) provides technical information, industry support and social opportunities to young people and newer entrants in the dairy industry.

Activities for the network are determined by a Steering Committee, made up of farmer and service provider representatives from across the region.

### Who we are looking for

We are looking for passionate young people in our industry, who would like to gain some experience in leadership, communication, governance or strategy.

We are looking for people who enjoy engaging with other young people in the industry and feel that they could help to enhance the YDN.

### What's in it for you

- Build skills that are helpful on and off farm
- Gain leadership experience that will help you on a pathway to other roles in industry
- Get exposure to new ideas and experiences in agriculture
- Be a part of priority setting, planning and development for the network
- Meet like-minded representatives from across the region and various industry organisations

### The commitment

The Steering Committee meets once every two months for a half-day meeting, with the location rotating around the region.

As a committee member, you are expected to attend a minimum of half our meetings annually. You will be reimbursed for your time.

Steering Committee members also nominate for sub-committees for some of our larger projects (e.g. our Study Tour or annual get-together) which requires an extra 2-4 hours per year.

Committee members are involved in our Discussion Groups, events and tours, of their choosing.

### To register your interest or nominate someone, please contact:
