

Worksheet 2a

Five Domains of Animal Welfare: Family Pets

Consider the Five Domains of Animal Welfare. What are the various ways that people ensure these domains are addressed when caring for a family pet.

Nutrition - How do pet owners ensure their pet has access to sufficient, balanced, varied, and clean food and water?

Environment - How do pet owners enable the comfort of their pets? (Consider factors such as temperature, space, air, odour, noise, and predictability).

Mental state - How do pet owners ensure negative states such as boredom, fear, frustration, hunger, and pain are reduced for their pets?

Health - How do pet owners ensure pets are maintaining fitness levels and are free of disease, injury, and impairment?

Behaviour - How do pet owners provide varied and engaging environmental challenges for their pets? (Consider opportunities for exploration, foraging, retreating, and companionship).

Worksheet 2b

Five Domains of Animal Welfare: Dairy Cows

Watch [How Dairy Farmers Care for Their Cows](#) (2:14).
What are the various ways that farmers ensure the Five Domains of Animal Welfare are addressed on a dairy farm?
